

# Divyansh Deep

divyanshdeep.dev@gmail.com | +91 7007509438 | github.com/Divyansh9192 | linkedin.com/in/Divyansh9192

## SUMMARY

Backend-focused CS undergrad with production experience in distributed, event-driven systems (Spring Boot, Kafka, Kubernetes) and AI/agent pipelines (FastAPI, LangGraph, pgvector). Strong on REST API design, service architecture, and containerized deployment

## EDUCATION

- JSS Academy of Technical Education** Noida, India  
*B.Tech., Computer Science & Engineering; CGPA: 7.98 / 10* 2023 – Present (4th Year)
- Green Valley English School** Varanasi, Uttar Pradesh  
*Intermediate (Class XII) – 94.4%* 2022
- Green Valley English School** Varanasi, Uttar Pradesh  
*Matriculation (Class X) – 95.6%* 2020

## SKILLS SUMMARY

- Languages:** Java, Python, JavaScript/TypeScript, C
- Backend & Web:** Spring Boot, FastAPI, Spring Cloud, REST APIs, Microservices, React.js, Next.js
- AI & Orchestration:** LangGraph, Multi-Agent Workflows, LLM Integration (OpenRouter, Gemini, Vertex AI)
- Databases:** PostgreSQL, pgvector, MySQL, Neo4j, Redis
- Messaging & Queues:** Apache Kafka, Celery, RabbitMQ, Event-Driven Architecture
- DevOps & Cloud:** Docker, Kubernetes, Docker Compose, Eureka, API Gateway
- Tools:** Git, GitHub, Linux, Postman, VS Code, IntelliJ IDEA
- CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design

## PROJECTS

- Orchrez – Multi-Tenant AI Marketing Automation Platform** Apr 2026 – May 2026  
*FastAPI, LangGraph, Next.js, Celery, RabbitMQ, PostgreSQL (pgvector), Redis, Docker Compose*
  - Built a durable, multi-agent AI workflow system that turns a company website into a structured brand profile, content calendar, and published campaigns
  - Designed a LangGraph metagraph with research/execution subgraphs and PostgreSQL-backed checkpoints to resume long-running workflows across phase boundaries
  - Built human-in-the-loop approval gates using LangGraph interrupts, with asset approval, inline editing, and natural-language regeneration
  - Implemented multi-tenant billing with Razorpay, including credit holds, commits, and idempotent webhook processing
- Semages – Semantic Image Search Engine** Jun 2026  
*OpenCLIP (ViT-B-32), PyTorch, Qdrant, Streamlit, Pillow*
  - Built a natural-language image retrieval system using OpenCLIP embeddings and cosine-similarity search over a Qdrant vector index
  - Designed an end-to-end pipeline for embedding generation, indexing, and real-time semantic querying through a Streamlit interface
- LinkedIn Clone – Distributed Microservices Platform** Jan 2026 – Feb 2026  
*Spring Boot, PostgreSQL, Neo4j, Apache Kafka, Docker, Netflix Eureka, Spring Cloud Gateway*
  - Decomposed the platform into 6 independent Spring Boot services – user, posts, connections, notifications, API gateway, and service discovery – each with its own database and clear ownership boundary
  - Centralized authentication and request routing through a Spring Cloud Gateway, validating JWTs once at the edge instead of in each service
  - Built an event-driven notification pipeline using Apache Kafka with 4 topics, decoupling post and connection actions from notification delivery
  - Designed a polyglot persistence layer: PostgreSQL for transactional data, Neo4j for graph-based social connections
- NeonStays – Hotel Booking & Management System** Nov 2026 – Dec 2026  
*Spring Boot, FastAPI, PostgreSQL, REST APIs, React, Tailwind CSS, Stripe*
  - Built a full-stack hotel booking platform with dynamic pricing logic based on demand and occupancy
  - Integrated the Stripe payment gateway with webhook handlers for secure, real-time payment processing
  - Designed and documented 25+ RESTful APIs for authentication, booking, admin, and payment workflows

## ACHIEVEMENTS

- 1st Place, Stellaris Hackathon – ABES Engineering College**
  - Won 1st place as part of team chillBuddies, organized in collaboration with GeeksforGeeks ABESEC
- Open Source Contributor – Jenkins**
  - Merged a pull request into Jenkins core, an open-source CI/CD automation server used by thousands of engineering teams worldwide
